

*Coron is the third-largest island in the Calamian group of islands found in Northern Palawan. It has many beautiful white sand beaches, large limestone cliffs, endemic terrestrial wildlife and rich marine ecosystems. It is home to picturesque Kayangan Lake, touted as the cleanest lake in the country, where you can swim and snorkel in its crystal clear waters and sunbathe on the beach.*

*Often cited in many lists of top dive spots in the world, Coron's main draw are several World War II Japanese wrecks found in depths as shallow as 12 meters and as deep as 43 meters.*

*Calauit Island is another point of interest. Various species of exotic African and Palawan endemic flora and fauna call it home. Hundreds of animals such as birds, giraffes, elans, topis, waterbuchs, mouse deer, zebras, beat cats and bush backs freely roam the island.*
